Our EXTRA EARLY types of dent and flint corn are selected for early maturity. They have been grown for many years under the same influence of severe and dry climatic conditions—thus developing a TYPE which is distinctly better than any other from which to grow MATURE CORN in this country. This is the ONLY KIND it pays to feed and if you wish to shell and ship your surplus, it is the kind to use because it GETS R I P E.

LET US HAVE YOUR ORDER NOW

Sample of orders now being received.

"Please send me at once 10 Bu of your Rustler White Cap early dent corn. I want the same type of North Dakota grown seed corn that I have been getting from you for the last seven years. This corn has always ripened before Sept. 10th. I like it because it makes good hard corn and is earlier than Minnesota 13. I have never bought seed corn from anyone else since I first tried-out your early type of North Dakota Grown seed corn seven years ago."

J. W. Johnson, Jan. 12, 1924

Portland, N. D., Jan. 8, 1924.

Mr. D. D. Simmons,

Moorhead, Minn.

Dear Mr. Simmons:-

Regarding our seed corn order for 1924. You may ship same sometime in February. We trust that you will ship us the same high quality early corn that you have been doing the past year

We have had splendid success with your Minnesota #13, Northwestern Dent and North Dakota White Flint.

Farmers that has given their corn field a fair chance has had perfectly ripe corn and a splendid yield per acre.

Yours truly,

Haugom & Grinley.
